

a high degree of probability that you are disabled or blind. For example, for claims involving the human immunodeficiency virus (HIV), the Social Security Field Office may make a finding of presumptive disability if your medical source provides us with information that confirms that your disease manifestations meet the severity of listing-level criteria for HIV. Of course, regardless of the specific HIV manifestations, the State agency may make a finding of presumptive disability if the medical evidence or other information reflects a high degree of probability that you are disabled.

[58 FR 36063, July 2, 1993]

§ 416.934 Impairments which may warrant a finding of presumptive disability or presumptive blindness.

We may make findings of presumptive disability and presumptive blindness in specific impairment categories without obtaining any medical evidence. These specific impairment categories are—

- (a) Amputation of two limbs;
- (b) Amputation of a leg at the hip;
- (c) Allegation of total deafness;
- (d) Allegation of total blindness;
- (e) Allegation of bed confinement or immobility without a wheelchair, walker, or crutches, due to a long-standing condition, excluding recent accident and recent surgery;
- (f) Allegation of a stroke (cerebral vascular accident) more than 3 months in the past and continued marked difficulty in walking or using a hand or arm;
- (g) Allegation of cerebral palsy, muscular dystrophy or muscle atrophy and marked difficulty in walking (e.g., use of braces), speaking, or coordination of the hands or arms.
- (h) Allegation of diabetes with amputation of a foot;
- (i) Allegation of Down's syndrome (Mongolism); and
- (j) Allegation of severe mental deficiency made by another individual filing on behalf of a claimant who is at least 7 years of age. For example, a mother filing for benefits for her child states that the child attends (or attended) a special school, or special classes in school, because of mental deficiency or is unable to attend any type

of school (or if beyond school age, was unable to attend), and requires care and supervision of routine daily activities.

DRUG ADDICTION AND ALCOHOLISM

§ 416.935 How we will determine whether your drug addiction or alcoholism is a contributing factor material to the determination of disability.

(a) *General.* If we find that you are disabled and have medical evidence of your drug addiction or alcoholism, we must determine whether your drug addiction or alcoholism is a contributing factor material to the determination of disability, unless we find that you are eligible for benefits because of your age or blindness.

(b) *Process we will follow when we have medical evidence of your drug addiction or alcoholism.* (1) The key factor we will examine in determining whether drug addiction or alcoholism is a contributing factor material to the determination of disability is whether we would still find you disabled if you stopped using drugs or alcohol.

(2) In making this determination, we will evaluate which of your current physical and mental limitations, upon which we based our current disability determination, would remain if you stopped using drugs or alcohol and then determine whether any or all of your remaining limitations would be disabling.

(i) If we determine that your remaining limitations would not be disabling, we will find that your drug addiction or alcoholism is a contributing factor material to the determination of disability.

(ii) If we determine that your remaining limitations are disabling, you are disabled independent of your drug addiction or alcoholism and we will find that your drug addiction or alcoholism is not a contributing factor material to the determination of disability.
